Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claim 1 (Currently Amended) A gum packing assisting tool for forcing soft gum

tissue of a patient around a tooth comprising:

an endless strand of material,

the endless strand being made of a material which is easily sterilized,

the endless strand being made of a flexible dense material which stretches when

under tension and which returns to its original shape when the tension is released, and which

admits of few, if any, pockets for housing germs and contaminants therein,

wherein the length of the endless strand is less than the circumference of tooth

around which soft gum is to be forced around, so that the endless strand can be tensioned to

allow the endless strand to be placed over and encircle the tooth and to tightly grip the edges of

the tooth when the tension is released, and

wherein the endless strand tool has portions of its cross-section to be of circular

configuration so as to facilitate rolling downward of the endless strand over the sides of a tooth

to the gum line oft heof the patient.

Claim 2 (Currently Amended) The gum packing assisting tool of Claim 1 wherein

the eross-sectional areacross section of the endless strand tool throughout its length is

substantially constant.

Claim 3 (Currently Amended) The gum packing assisting tool of Claim 1 wherein

the cross-section area of the endless strand tool varies along its length.

Application Serial No. 10/774,451

Attorney Docket No.: 644/37423

Page 6

Claim 4 (Original) The gum packing assisting tool of Claim 3 wherein the cross-

sectional area of the endless strand tool has at least two widened portions, the ends of which are

spaced from each by an equal distance.

Claim 5 (Original) The gum packing assisting tool of Claim 1 wherein a portion of

the endless strand tool has at least one projecting tab to allow a dental practitioner to grip and

pull the tab to elongate the endless strand tool to permit easy removal of the endless strand tool

from around a tooth.

Claim 6 (Original) The gum packing assisting tool of Claim 2 wherein a portion of

the endless strand tool has at least one projecting tab to allow a dental practitioner to grip and

pull the tab to elongate the endless strand tool to permit easy removal of the endless strand tool.

from around a tooth.

Claim 7 (Original) The gum packing assisting tool of Claim 3 wherein a portion of

the endless strand tool has at least one projecting tab to allow a dental practitioner to grip and

pull the tab to elongate the endless strand tool to permit easy removal of the endless strand tool

from around a tooth.

Claim 8 (Original) The gum packing assisting tool of Claim 4 wherein a portion of

the endless strand tool has at least one projecting tab to allow a dental practitioner to grip and

pull the tab to elongate the endless strand tool to permit easy removal of the endless strand tool

from around a tooth.

Claim 9 (Original) The gum packing tool of Claim 5 wherein the endless strand

tool has at least two projecting tabs equally spaced from one another to allow the dental

Page 7

practitioner to grasp and pull the tabs for easier elongation of the endless strand to assist in

placing on and removal of the endless strand tool about a tooth.

Claim 10 (Original) The gum packing tool of Claim 6 wherein the endless strand

tool has at least two projecting tabs equally spaced from one another to allow the dental

practitioner to grasp and pull the tabs for easier elongation of the endless strand to assist in

placing on and removal of the endless strand tool about a tooth.

Claim 11 (Original) The gum packing tool of Claim 7 wherein the endless strand

tool has at least two projecting tabs equally spaced from one another to allow the dental

practitioner to grasp and pull the tabs for easier elongation of the endless strand to assist in

placing on and removal of the endless strand tool about a tooth.

Claim 12 (Original) The gum packing tool of Claim 8 wherein the endless strand

tool has at least two projecting tabs equally spaced from one another to allow the dental

practitioner to grasp and pull the tabs for easier elongation of the endless strand to assist in

placing on and removal of the endless strand tool about a tooth.

Claim 13 (Currently Amended) The gum packing tool of Claim 1 wherein the

endless strand tool as-has a medicinal coating for treatment of any one of: pain, infection, and

pain and infection.

Claim 14 (Original) The gum packing tool of Claim 1 wherein the endless tool is

biodegradable.

Claim 15 (Original) A kit of a plurality of gum packing tools as defined in Claim 1

wherein the plurality of tools includes tools of at least one of different length endless strands,

different thicknesses, and different shapes.

Application Serial No. 10/774,451

Attorney Docket No.: 644/37423

Page 8

Claim 16 (Original) A kit of a plurality of gum packing tools as defined in Claim 2 wherein the plurality of tools includes tools of at least one of different length endless strands, different thicknesses, and different shapes.

Claim 17 (Original) A kit of a plurality of gum packing tools as defined in Claim 3 wherein the plurality of tools includes tools of at least one of different length endless strands, different thicknesses, and different shapes.

Claim 18 (Original) A kit of a plurality of gum packing tools as defined in Claim 4 wherein the plurality of tools includes tools of at least one of different length endless strands, different thicknesses, and different shapes.

Claim 19 (Original) A kit of a plurality of gum packing tools as defined in Claim 5 wherein the plurality of tools includes tools of at least one of different length endless strands, different thicknesses, and different shapes.

Claim 20 (Original) A kit of a plurality of gum packing tools as defined in Claim 9 wherein the plurality of tools includes tools of at least one of different length endless strands, different thicknesses, and different shapes.

Claim 21 (Original) The method of packing soft tissue gums around a tooth comprising the steps of:

selecting a gum packing assisting tool of Claim 1, tensioning the gum packing assisting tool to stretch the tool, placing the stretched tool over and around a tooth, releasing the tension on the tool,

Application Serial No. 10/774,451 Attorney Docket No.: 644/37423

Page 9

moving the tool along the tooth until the tool touches the soft tissue gum adjacent the root portion of the tooth,

tamping the tool to move the touching soft tissue gum against the root portions of the tooth, and

removing the tool from the tooth.

Claim 22 (Currently Amended) The method of Claim 19-21 wherein the moving of the tool is accomplished via rolling of the endless strand of material toward the gum line.
